

CENTRE FOR STATISTICAL ANALYSIS (CSA)

Department of Statistics

Rajagiri College of Social Sciences (Autonomous)

Rajagiri College of Social Sciences (RCSS) was established in 1955 as the Department of Social Work at Sacred Heart College, Thevara and was the fruit of the long-cherished dream of Rev. Fr Francis Sales CMI, the Founder Director. In 1967, the Postgraduate Department of Social Work was shifted from Sacred Heart College Thevara to Rajagiri Kalamassery as an off-campus study Centre of the college. The year 1980 was a landmark in the institution's history when it was raised to an independent college affiliated with the University of Kerala. The college was then officially named "Rajagiri College of Social Sciences". The Department of Personnel Management was established in 1984, and the Department of Business Administration in 1995. The Department of Computer Science (2001) and Library and Information Science were started in 2001 and 2005 respectively.

UGC has granted Rajagiri College of Social Sciences autonomous status in 2014, and subsequently, the Department of Commerce and Professional Studies (2015) and Department of Psychology (2016) were established. The college has been ranked with the highest ratings in previous NAAC accreditations, and is accredited with the highest score (A++, Grade with CGPA of 3.83) in the country in the fourth cycle in 2021. The college has established the Department of Statistics in 2021 with a new program of MSC Statistics with Data Science.

Centre for Statistical Analysis (CSA)

Dept. of Statistics, Rajagiri College of Social Sciences (Autonomous), has set up the Centre for Statistical Analysis (CSA) to provide professional statistical consulting services to academic fraternity, corporates, industry and government sector. The Centre envisages offering quality statistical consulting services in all aspects of quantitative research projects, from the initial research design phase to the presentation of final reports. In addition, the Centre makes strides to build partnerships with the national and international agencies and institutions engaged in data analysis to enhance the quality of research outcomes for promoting sustainable ecology, society, and economy.

Statistical Consultation Services

The Centre collaborates with academic and research units of the college to provide statistical consultation support for various stakeholders, namely academics, financial institutions, corporations and government agencies. In addition, the Centre is well equipped with highly qualified consultants who can help clients design and manage research projects in social sciences, management & other allied disciplines and various professional practice domains. The faculty members and researchers who have already collected data and looking for data analysis support can approach the Centre for professional help in statistical analysis.

Workshops and Conferences

The Center regularly conducts short duration and weekend training programs for faculty members, postgraduate students and doctoral scholars in research methodology, basic and advanced statistical methods, statistical software such as SPSS, Stata, EViews and R.
